

Transforming Visibility Through Answer Engine Optimization (AEO) for ITEN Industries

ITEN Industries is a 100-year-old manufacturer with a strong legacy but an underperforming digital presence. Despite having a website for over 20 years, ITEN was almost invisible in search results and entirely absent from AI-driven discovery. This created a disconnect between their established reputation in the market and their online visibility.

CHALLENGES

- 1 Low search visibility:** ITEN's website ranked on pages 3–5 for relevant keywords.
- 2 Absence in AI results:** The company did not appear in AI Overviews or generative search outputs.
- 3 No presence in Local Pack:** ITEN was missing from Google's valuable local visibility section.
- 4 Competitive disadvantage:** Competitors were more visible online, even when their market presence was less established.
- 5 Risk of digital invisibility:** As buyer behavior shifts to AI and search-first discovery, ITEN risked being overlooked by new prospects.

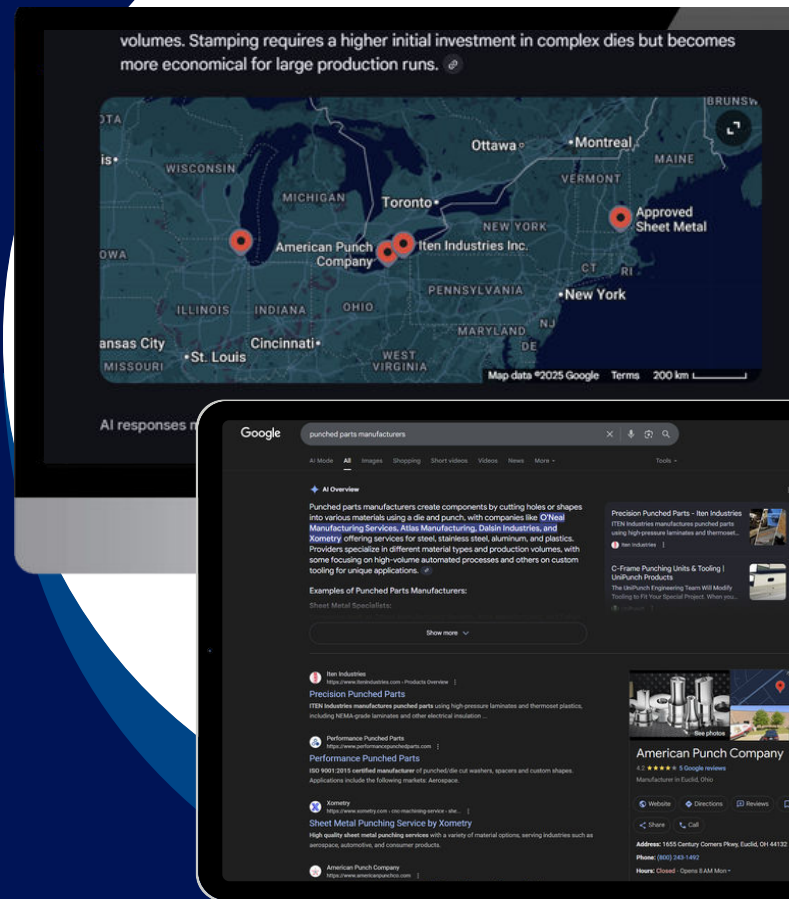

OPPORTUNITY

- Leverage heritage with relevance:** Translate ITEN's century-long expertise into authoritative, findable content.
- Optimize for multiple search environments:** Improve visibility across traditional Google SERPs, Local Pack, and emerging AI-driven results.
- Close competitive gaps:** Build stronger digital positioning to match and exceed competitors.
- Shape AI discovery:** Ensure ITEN is included in AI-generated overviews where buyers increasingly turn for answers.
- Sustain long-term visibility:** Establish a modern SEO foundation capable of adapting to continued changes in search and AI.

ACTION

50 Marketing developed a comprehensive program, executed over six months, to elevate ITEN's visibility. The process included:

- 1 Competitor Research:** Analyzing direct and indirect competitors' online positioning.
- 2 Product & Service Research:** Identifying the specific offerings most valuable to ITEN's target buyers.
- 3 Keyword Research:** Finding opportunities across traditional and AI-driven search environments.
- 4 AI Search Testing:** Reviewing how ITEN and competitors appeared—or failed to appear—across AI tools.
- 5 Subject Matter Expert Interviews:** Capturing ITEN's authentic voice and expertise.
- 6 Content Recommendations:** Mapping new opportunities to strengthen relevance and authority.

SOLUTIONS

The insights revealed significant gaps and untapped potential in ITEN's online presence. 50 Marketing executed a content-driven strategy designed to:

- Develop targeted content aligned with buyer intent.
- Optimize pages for both Google SERP performance and AI inclusion.
- Strengthen ITEN's authority by leveraging subject matter expertise.
- Ensure consistent visibility across traditional SEO, GEO, and AEO.

REMARKABLE ACHIEVEMENT

ITEN now competes head-to-head with industry giants and consistently wins digital visibility battles. Their strong search presence ensures they are discoverable across traditional and AI-driven environments, securing long-term competitive advantage.

THE OUTCOME

The campaign transformed ITEN from an online unknown to an industry leader in digital visibility. By optimizing for SEO, AEO, and GEO, ITEN achieved results that directly positioned them above major competitors.

Key outcomes included:

#1 Organic Rankings: Secured top positions for critical terms such as G-10 laminate manufacturers and precision punched parts.

AI Overview & Knowledge Panel Presence: Earned mentions in Google's AI Overviews and appeared in multiple Knowledge Panels – previously absent entirely.

Competitive Wins: Outperformed Xometry in organic results, a significant achievement for an independent manufacturer against a national leader.

Expanded Visibility: Achieved top-tier rankings in image search, map results, and buyer simulation AI modes.

Category Leadership: Dominated search visibility across both G-10 laminates and precision punched parts, strengthening ITEN's authority in multiple market segments.
